	1:15 p.m.	Students return to class

Expected Attendance: 150

Street School to Participate in Solar Eclipse

TULSA, OK – A total solar eclipse will occur across the entire continental United States on Monday, August 21, 2017 and all Street School students and staff in addition to sponsors will experience this historic event on the first day of school.

Direct Energy will distribute solar glasses and Oklahoma First Federal Credit Union will handout popsicles as everyone gathers in the Street School parking lot to watch the partial eclipse. Street School science teacher Sam Martin will serve as the “Celestial DJ” to play songs like “Moon Shadow” from Cat Stevens and “Ain’t No Sunshine” by Bill Withers.

“At Direct Energy, we lead energy innovation through connected experiences that make a difference in people’s lives,” said Mark Boyd, Senior Director of Direct Energy. “I can’t think of a better way to celebrate the solar eclipse than by providing solar glasses to some deserving students on the first day of school.”
